Managing the Bite

Timothy C. Adams, DDS
is a graduate of Indiana
University School of
Dentistry where he taught
clinical dentistry for 5 years.

He maintained a highly successful full-time private practice emphasizing esthetic-restorative dentistry for over 18 years. He is a past Clinical Director at the Las Vegas Institute for Advanced Dental Studies.

Dr. Adams has lectured internationally and has authored several dental publications, including co-authored a chapter in *Dental Clinics of North America*.

Course Objectives

ONE DAY LECTURE FORMAT

- Revisiting what we think we already know about occlusion — or do we?
- Breaking the stomatognathic system down to the individuals parts — then putting it all together by reviewing the joints, occlusion and the muscles and their affect on the facial structure.
- Thinking differently about that typical patient facial shot — the hidden clues to pathology.
- A brief look at the craniomandibular joint anatomy and the effects of a static load.
- Managing the bite.
- Understanding the intraoral signs and symptoms and how they relate to your diagnostic models.

The why and how of TENSing: A step by step on where to start with taking a TENS bite.

- The key ingredients to a successful full mouth restorative case whether it be one or two arches being restored at the same time.
- What is stable and how do you know when to restore.
- A unique and different way to look at coronoplasty.
- Some interesting pearls for the dentist in the trenches doing quadrant dentistry.
- A step by step 10 unit veneer case.
- A smile make over utilizing a diode laser incorporating the principles of smile design.
